Re: Claresholm Skatepark request - Phase 2

Dear Council/Town of Claresholm,

With the successful completion of our town's skatepark this summer, we at the Skatepark Association are inspired by the positive impact it has already brought to the community. We believe there is vast potential to further enhance the space with additional recreational amenities that will continue to benefit our youth and families.

To expand upon the existing facility, we would like to propose the addition of new features such as a pump track for bicycles—an asphalt course with exciting elements similar to a motocross track—or perhaps a skate bowl that will offer a challenging element to the existing skatepark. We envision a finished space complete with clear pathways, lighting, and well-designed landscaping that creates an inviting and enjoyable environment for families, kids, and visitors alike.

We are currently in the process of applying for a raffle and casino eligibility license with AGLC, which will support our ongoing fundraising efforts. With the completion of our initial facility, we also anticipate that more grant opportunities will now be available, helping us fulfill our vision for an expanded, family-friendly recreational hub. We are committed to engaging with our community and fostering a strong sense of local pride and involvement as we work toward these goals.

I would welcome the opportunity to discuss our proposal with the Town Council in greater detail. Please let me know if it would be appropriate for me to attend an upcoming meeting as a delegation to share our ideas and answer any questions.

Thank you for considering this request.

Thank you,

Lisa Darch - Chairperson, Claresholm Skatepark Association
